

## Our Vision - Business and Community Hub

This isn't just a "development". We see a truly green-eco-friendly integrated business and community hub that will be a centrepiece in our next major market - for years to come. It will be the gateway to a growing and vital Port Hope. That's why it's called THE CENTRE POINT AT PORT HOPE.

THE CENTRE POINT AT PORT HOPE will lead the growth. It's designed to attract current and new residents, and draw travelers, especially the more affluent, through community services, employment, entertainment and shopping. This project will also be the catalyst for new developments to meet Port Hope's needs for residences and businesses. The components we envision to develop on the property are hotel, conference centre, banquet hall, restaurants, class A office space, retail and retail box store.

We will give companies affordable land for expansion to meet this opportunity and develop the above components while fulfilling the dreams of people by building places to work, live and play.

We want the best for Port Hope and welcome any suggestions from the community.

Please share them with us:
