

Community Services

The area has a good population base, with over 400,000 in an easy commute. And we have just the right location to support businesses such as a community centre, senior services, medical services, fitness centres and residence-style schools.

In particular, the area's demographics are ideal for medical services.

- Older population - 39% are over 50 compared to 32% across Ontario
- Currently seen as an ideal retirement community
- New "state of the art" hospital (Northumberland Hills) is just a 10 minute drive away
- Port Hope already has many health related small shops
- Senior services are encouraged in the Port Hope strategic plan
